Unlock the limitless potential of the future by enrolling in "Generative AI and the Law" course, where you'll pioneer the intersection of artificial intelligence and legal expertise. Discover the transformative power of Generative AI in the legal field with our exciting course:

This course will aim to provide students with

- An awareness of the fundamentals and limitations of Generative artificial intelligence and their application in the legal field.
- The ability to utilise Generative artificial intelligence to automate legal research, document generation, and contract analysis.
- The ability to use Generative artificial intelligence for client communication, marketing, case analysis, and legal writing.
- An understanding of ethical considerations and quality control measures when using Generative AI in legal services.
- Avoid common mistakes generative AI can create: from bias to outright hallucinations.

Teacher: Knut Fournier is US and HK qualified lawyer and a specialist of ecommerce and media regulation.
